stack

Own it. Play it everywhere.

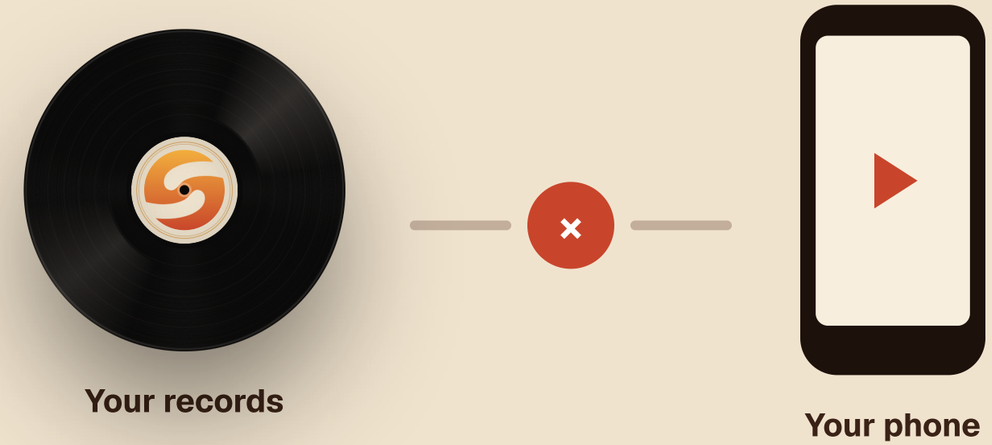

The vinyl and CDs on your shelf, playable on your phone, shared with your family, and sold on when you're done.

Harrison Greener · Pitch deck

You own the record.
You still pay to hear it.

Records and phones don't talk to each other. Own *The Dark Side of the Moon* on vinyl, and you still pay a streaming service to hear it on the bus.

02 The solution

Owning the record unlocks it everywhere.

Add a record once by barcode, Discogs or the Puck, and it plays on every device, for your whole family.

Your collection

Browse covers, a crate or a list

Play anywhere

Every record you own, in lossless

Share it

Family, friends and the Marketplace

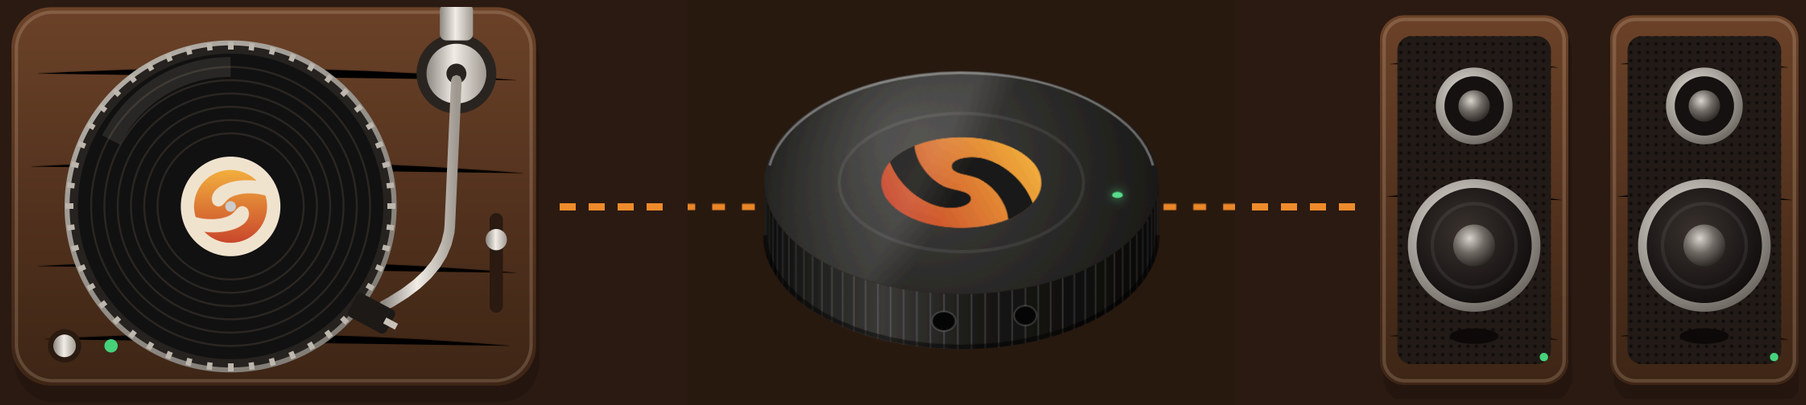

A spin becomes your own copy.

Sound passes through
Untouched, to your speakers

Records your copy
Hi-res, crackle and all

From £30
Or 3 for £75

The Puck sits between your turntable and speakers. Sound passes straight through while it records your copy in hi-res, crackle and all, and logs every play.

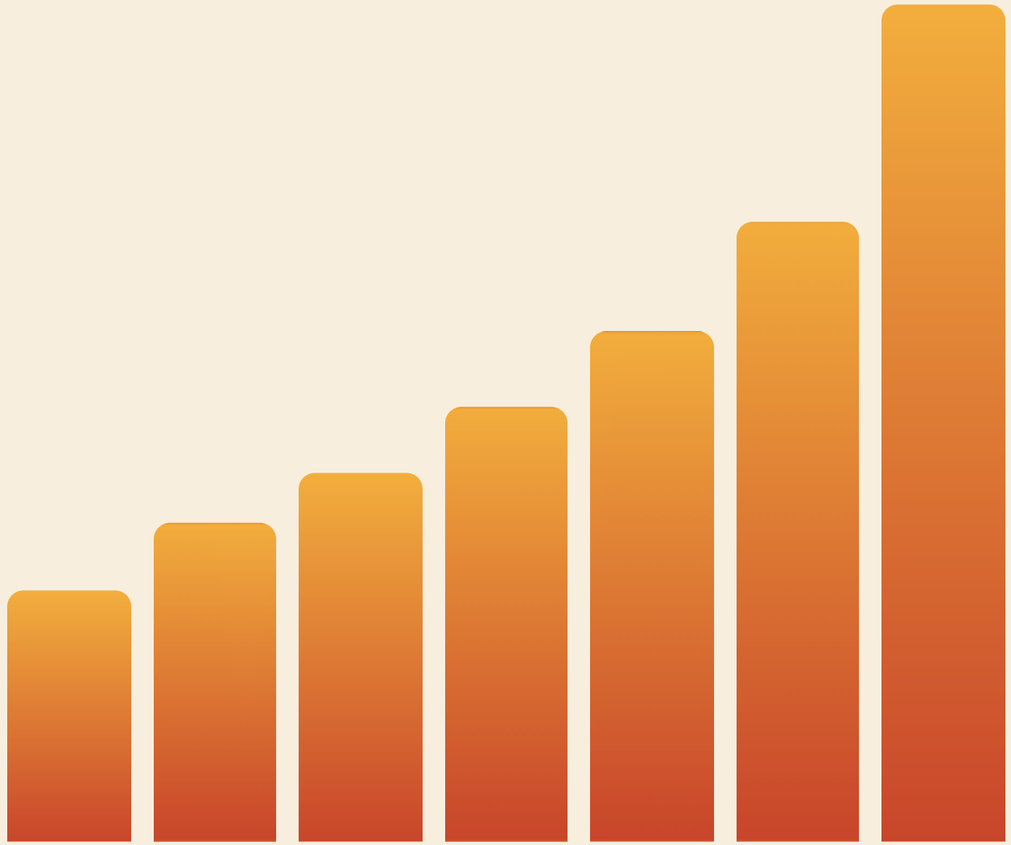

£174.4m

UK vinyl sales in 2025.

Up 19.9% in a year, the highest in around 30 years.
Collectors want to own music again.

Sources: BPI (2026); Marsden (2026). Bars show the trend.

+19.9%
growth in a year

11 years
of growth in UK recorded music

One loop, four ways in.

Each part feeds the next. Your own music is free; Stack earns when people share, buy a Puck or trade records.

Also earning: Stack Supply · Record shop partners

06 Pricing

Your music is free. Sharing it is what you pay for.

Just you

Solo

Free

Every record you own, anywhere, in lossless, with no ads

2 people, one home

Duo

£10/month

One shared Stack for two

Up to 4 people

Family

£19.99/month

Everyone streams everything the family owns

The Puck £30, 2 for £50, 3 for £75

Marketplace 8% seller fee, payment held until it arrives

Stack Supply clothing and record gear

The whole model, on one page.

Lean Canvas after Maurya (2012).

Problem

- You own the record but pay again to stream it
- Records and phones don’t talk to each other
- Collections sit on a shelf, unshared

Solution

- Add once by barcode, Discogs or the Puck
- Play in lossless on any device
- Share with family, sell on when done

Key metrics

- People on Stack
- Shared homes paying
- Pucks sold
- Marketplace sales

Unique value

Own it. Play it everywhere.

The records you own: playable, shareable and sellable, in one app

Unfair advantage

- The Puck links a real turntable to the app
- A working prototype, already tested

Channels

- Manchester record shops
- Record Store Day
- TikTok and Instagram
- Invite a friend

Customer segments

- Vinyl and CD collectors
- Families sharing one collection
- Record shops selling second-hand
- Early adopters: Manchester collectors and students

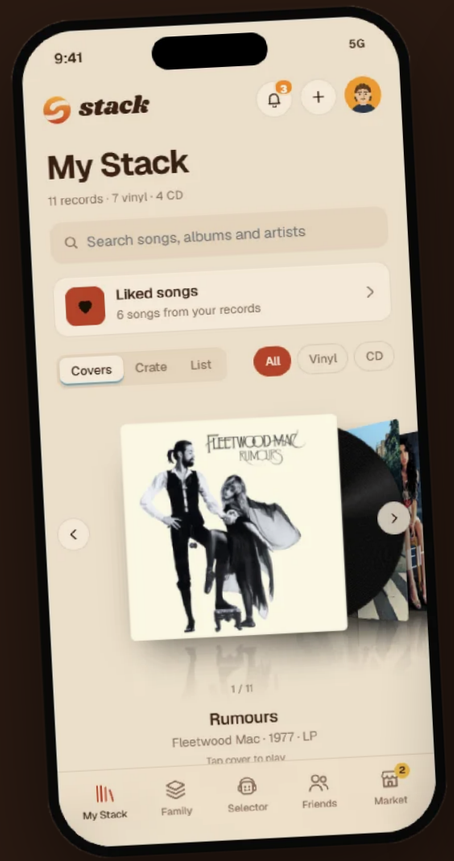

Cost structure

- Label licensing and royalties
- Making and certifying the Puck
- Hosting and lossless storage
- Marketing and shop partnerships

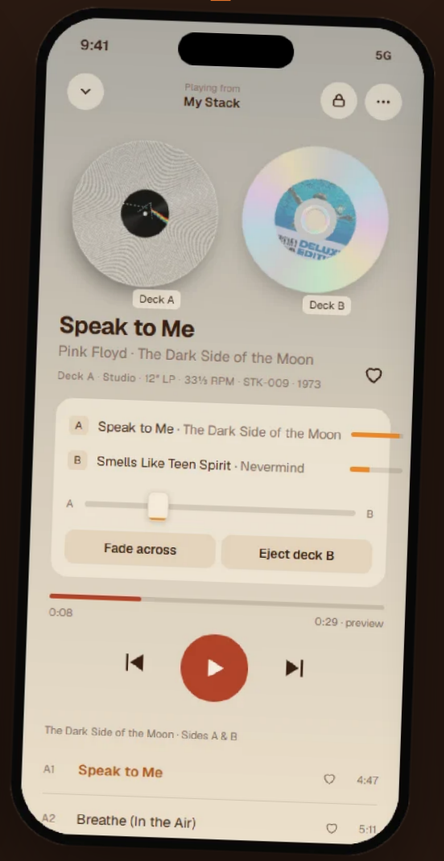

Revenue streams

- Duo £10 and Family £19.99 a month
- The Puck from £30
- 8% Marketplace seller fee
- Stack Supply and shop partners

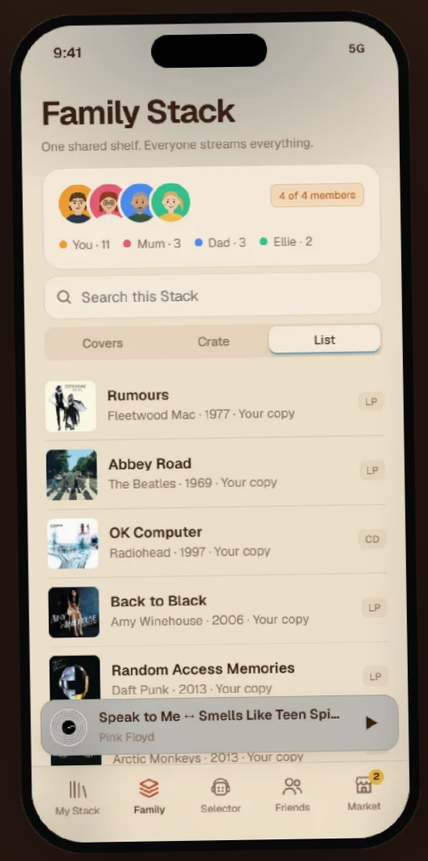

A working app, not a mockup.

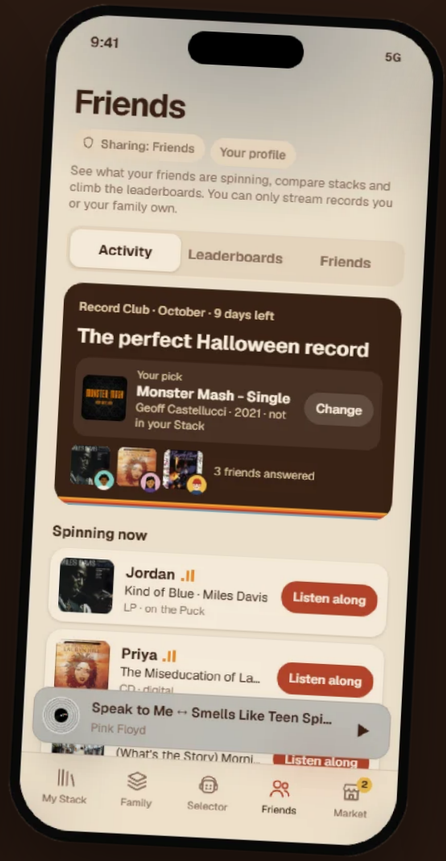

My Stack

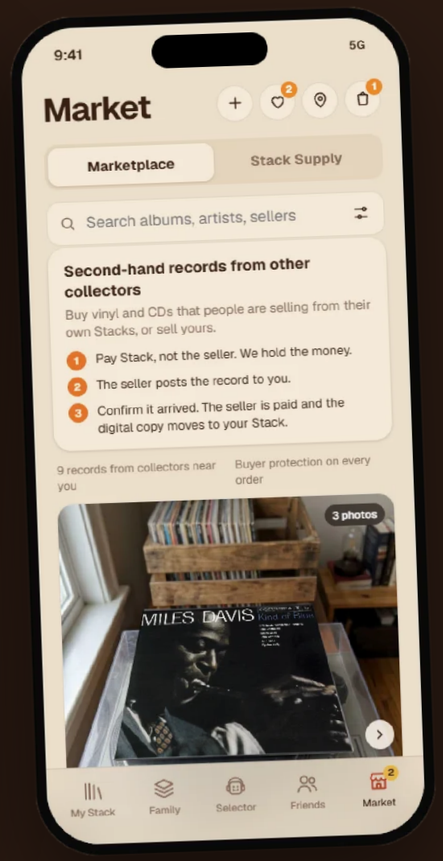

Two decks

Family Stack

Friends

Marketplace

What testers said.

“I think this is something young people will really connect with. I’d definitely use it myself to help sell for my business.”

P1 · 48, vinyl shop owner

“The interface is so much better than other vinyl collecting apps. This is something I’d use, and I’d probably share records with my sister.”

P2 · 20, freelancer

“Why doesn’t this already exist?”

P3 · 31, teacher

10 Iteration

What testing changed.

Build → Measure → Learn → Change

Feedback

A tester said the first orange and black look resembled an adult website's branding.

What changed

A warm 70s palette

Cream, sunset orange and walnut, closer to record culture.

In the app from 8 Oct

Feedback

A tester suggested a place to buy and sell records.

What changed

The Marketplace

Second-hand records with ownership transfer, now earning an 8% fee.

Built 17 Oct

Feedback

A tester wanted to share records and see what friends play.

What changed

Friends

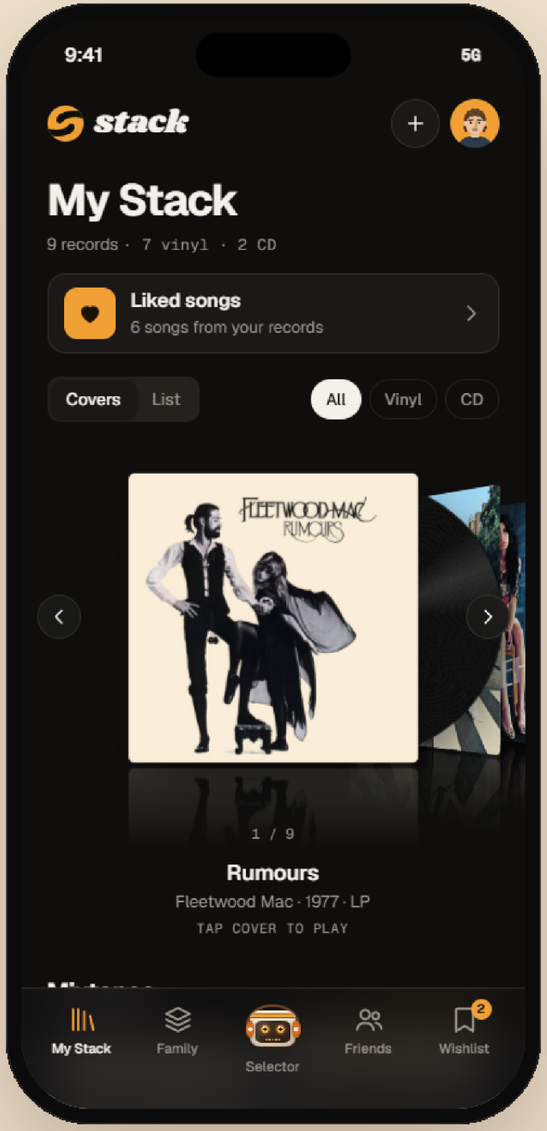

Profiles, activity, badges and listening rooms. It also feeds the sharing plans.

Built 19 Oct

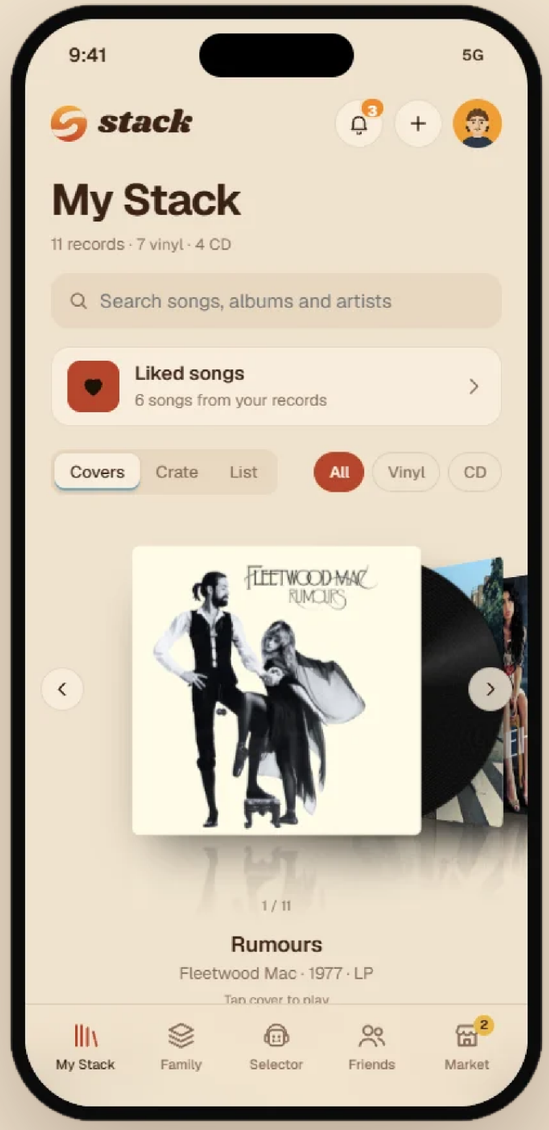

11 Before and after

One tester, a whole new look.

The first version was black and orange. A tester said it resembled an adult website's branding, so the brand moved to warm 70s colours that fit record culture.

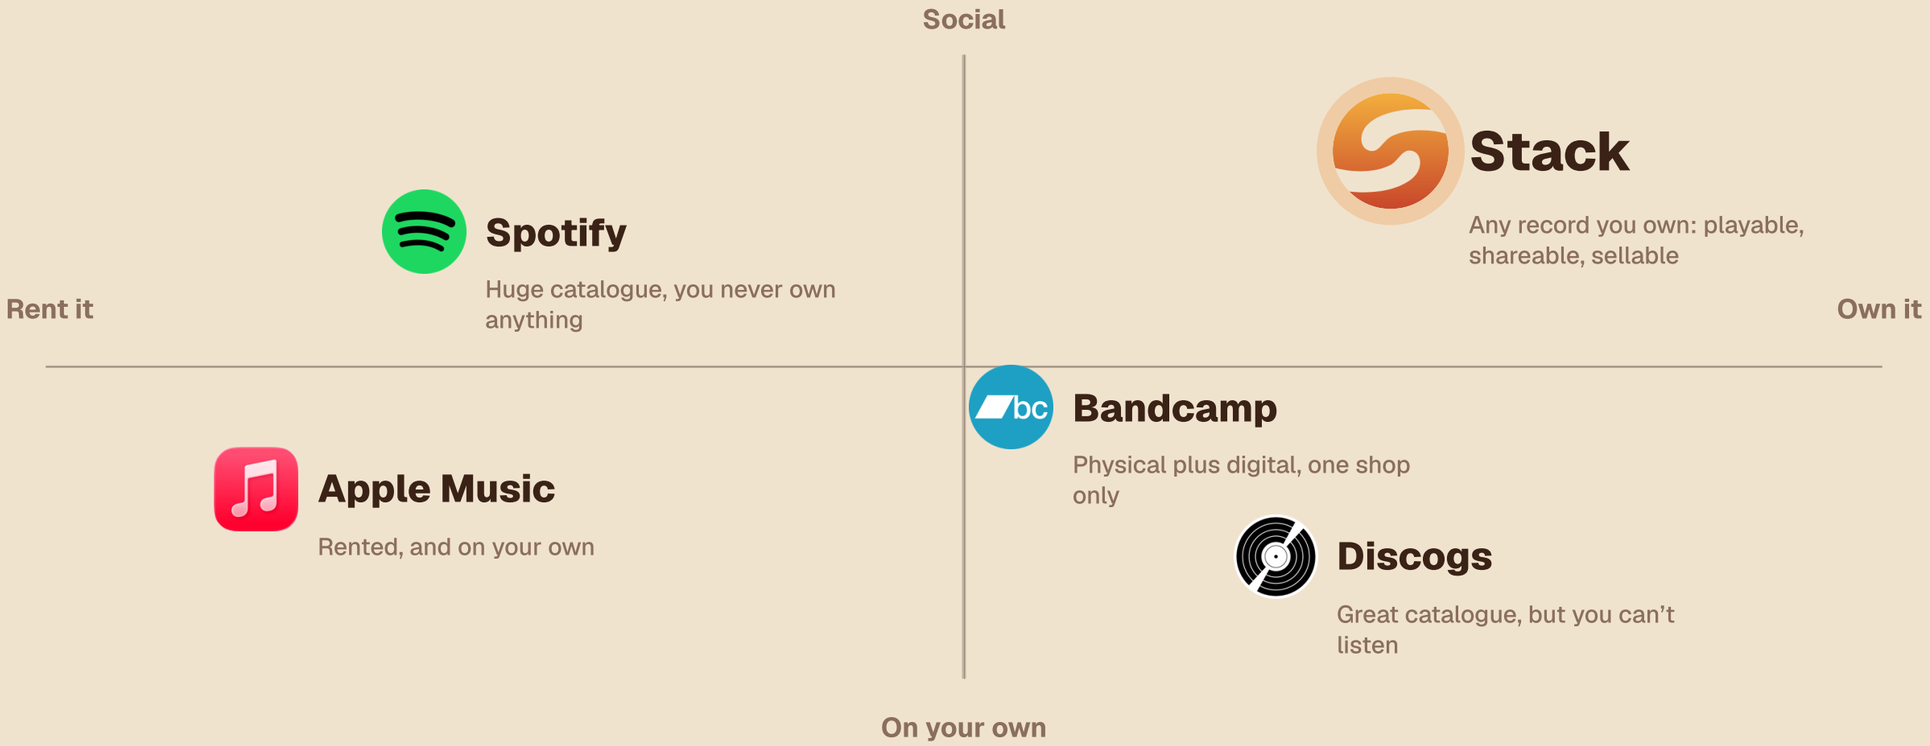

Before
Black and orange

After
Warm 70s palette

12 Competitors

Other apps do one thing.
Stack does all three.

13 Launch

Start in Manchester, grow from record shops.

Year 1

Manchester

40,000

people on Stack

5,000 shared homes

12 partner shops

Partner record shops, students and Record Store Day

Year 2

The North West

200,000

people on Stack

25,000 shared homes

45 partner shops

Liverpool, Leeds and Sheffield shops join

Year 3

The UK

640,000

people on Stack

80,000 shared homes

150 partner shops

Label partnerships and the Puck in stores

Out in the world, and on every phone.

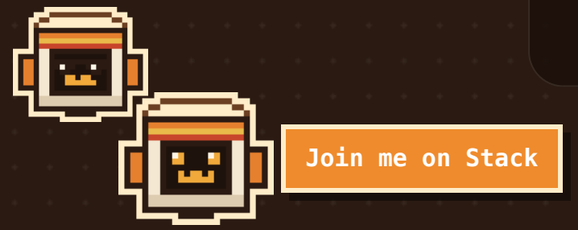

Physical

Out in the world

- Stickers and posters in partner record shops
- Record Store Day events and listening parties
- The Puck on shop counters
- Stack Supply clothing and tote bags

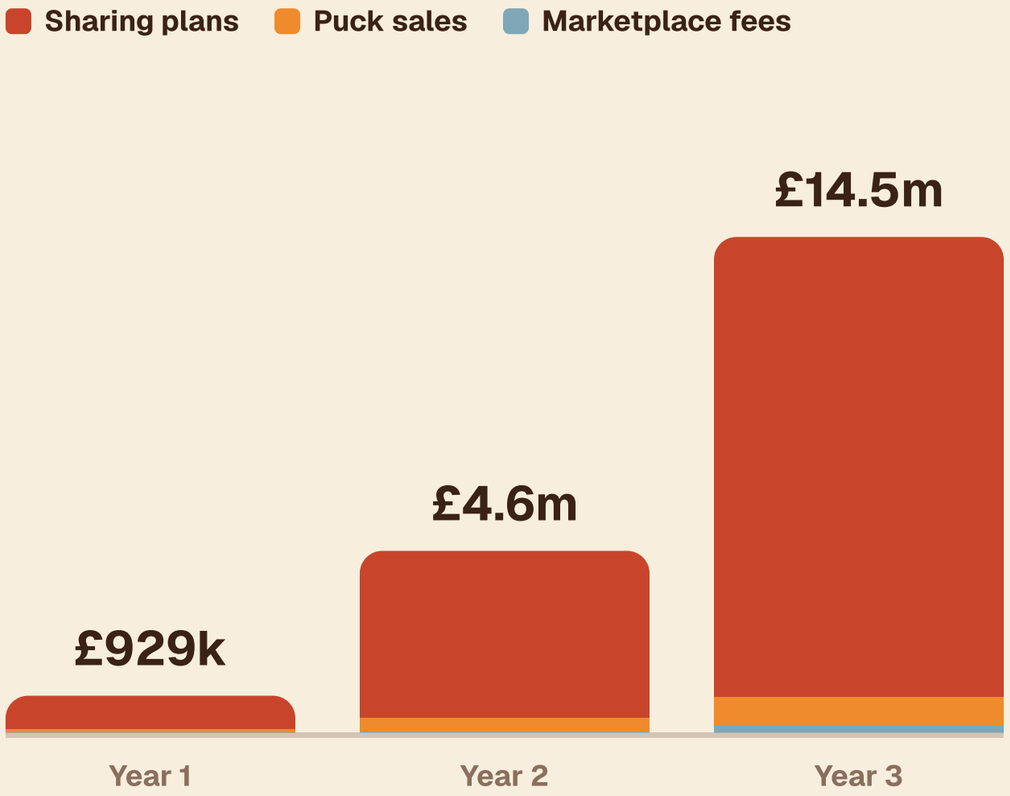

Digital

On every phone

- TikTok and Instagram campaigns
- Music creators and DJs showing their Stacks
- Shareable Stack Wrapped and Record Club picks
- Invite a friend, you both get a month free

How Stack makes money.

	Year 1	Year 2	Year 3
People on Stack	40,000	200,000	640,000
Shared homes paying	5,000	25,000	80,000
Sharing plans	£840k	£4.2m	£13.4m
Puck sales	£80k	£320k	£880k
Marketplace fees	£10k	£48k	£154k
Total	**£929k**	**£4.6m**	**£14.5m**

Based on the assumptions on the next page. Stack Supply and record shop commission come on top.

16 Revenue forecast

How Year 1 adds up.

Starting from 40,000 people on Stack in Manchester.

Sharing plans — £840k

1 in 8 people share a Stack at home: 40,000 × 12.5% = 5,000 homes × £14.00 a month (60% Duo at £10, 40% Family at £19.99) × 12

Puck sales — £80k

40% of new shared homes buy one: 5,000 × 40% = 2,000 Pucks × £40 average with bundles

Marketplace fees — £10k

Each shared home buys about £24 of second-hand records a year: 5,000 × £24 = £120k sold × 8%

Year 1 total — £929k

Solo is free, so the other 87.5% of people pay nothing to play their own records.

17 Risks

The risks, and the answers.

Risk

Music rights

Owning a record doesn’t give you the right to stream or copy it.

Answer

Partner with labels

Many records already come with a download code. Stack becomes its home, licensed, with royalties on every play.

Risk

Hardware costs

Making, certifying and shipping the Puck is expensive.

Answer

Start small, keep it optional

Barcode and Discogs import work without it. The Puck launches in small batches through record shops.

Risk

An empty marketplace

Buyers won’t come without sellers, and the other way round.

Answer

Launch city by city

Manchester first, with partner record shops listing second-hand stock from day one.

18 Capability

Already built, not just planned.

Stack isn’t an idea on paper. These are live now.

A working app

Collection, two-deck player, Family Stack, Friends and Marketplace, all usable today

A full brand

Logo, DJ Selector, stickers, merch and brand guidelines

A film and pitch site

The intro film and an interactive pitch site

Tested and changed

Feedback from real users, with three changes made

Own it.
Play it everywhere.
